## Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

### **DETAILED ACTION**

1. In response to the Supplement Amendment dated August 4, 2002, claims 1-14 are present for examination.

### **Examiner's Statement of Reasons for Allowance**

2. Claims 1-14 are allowed. Because the prior arts of record fail to teach or suggest a memory cell array and associated method, comprising a substrate having a main face; a first insulating layer configured on said main face of said substrate, said first insulating layer formed with a trench having a bottom and edges; a first line configured in said trench of said first insulation layer; a second line; a memory element configured at a point of intersection between said first line and said second line, said memory element being switched between said first line and said second line; a first yoke disposed adjacent said bottom and said edges of said trench of said first insulation layer, said first yoke configured such that a magnetic flux through said first yoke is essentially closed in said memory element, said first yoke including a magnetizable material with a relative permeability of at least 10; and a line selected from the group consisting of said first line and said second line being supplied with current during a write access and being partially surrounded by said first yoke as claimed in the independent claims 1 and 10.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2824

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sakakima et al. (U.S. Pat. No. 6,005,798), Chen et al. (U.S. Pat. No. 5,732,016) and Suzuki et al. (U.S. Pat. No. 5,703,733) disclose a magnetoresistance device similar to that of the present application, but do not teach a first yoke, said first yoke including a magnetizable material with a relative permeability of at least 10; and a line selected from the group consisting of said first line and said second line being supplied with current during a write access and being partially surrounded by said first yoke as claimed in the independent claim 1.
